String or Int

Write an implementation of a function named `isNumber` that determines
if `String` can be converted to `Int` . If it can, then return its `Int` value, otherwise
return the same `String`.

Tip: You can use `String` function `.toIntOrNull()`

Sample Input 1:

1

Sample Output 1:

1

Write a program in Kotlin   📄 Report a typo

Code Editor   IDE 💎 ➕ 100

```kotlin
1   fun isNumber(input: String): Any {
2       val number = input.toIntOrNull()
3       return number ?: input
4   }
5
```
